Easy to Use - More Convenience for your Customers

Standard Change-Makers BX Series Bill-to-Bill Exchangers is available with the Fujitsu F53 Bill Dispenser. Combining our Modular *Smart Hopper* technology and MDB serial interface, the BX-Fujitsu Series will provide more convenience and choices for your self-service businesses.

These Bill Exchangers accept higher denomination bills, and dispense lower denominations. The BX1020RL has the two-denomination F53 bill dispenser, that can break \$10's and \$20's into \$5's and \$1's. You can now have up to four dispensers - providing additional capacity, or multiple denomination pay-outs. Available in both Front and Rear Load configurations.

You decide what you need, and we will build it!

BX-Fujitsu Series standard features include:
