

MODULAR RETROFIT KIT

FOR THE ROWE MODEL BC1400
BY STANDARD CHANGE-MAKERS

Standard Change-Makers introduces a Modular Retrofit Kit for aging Rowe BC1400 change machines. This is a unique solution, which allows you to gut the internals of the installed machine and make room for: two steel, Modular series coin hoppers AND one MEI downstacker bill acceptor with 500 bills stacker. The BC1400 RETROFIT KIT would give you a coin capacity of 6,400 Quarters and \$1-\$20 bill acceptance - all in EASY-TO-INSTALL assemblies.

An ideal solution for locations that have been having trouble maintaining this aging equipment, and can't modify the wall due to construction constraints of competing products. Everything fits inside the exiting cabinet.

Here's what's included:

The Retrofit Kit consists of 3 Assemblies:

- Hopper Platform/Bracket with 2 Hoppers
- Bill Acceptor Bracket/Cover Plate
- Power Supply Assembly (not shown)
- *All hardware and cables are included*
