## Changers that make DOLLAR\$ and \$ENSE

Standard Change-Makers' BCX Series Changers provide more convenience for your customers - by breaking those Tens and Twenties into combinations of bills and coins! Our Bill & Coin Exchanger (BCX) Series is ideal for attended or unattended self-service businesses. Now you can offer your customers the benefit of bill change with their coinage, without paying benefits for an attendant.

Our BCX-Fujitsu Bill Exchangers accept higher denomination bills (\$20s & \$10s), and dispense lower denominations with coinage (\$5, \$1 and Quarters or Tokens). The versatility of the design allows business owners to maximize revenue opportunities and take the bill breaking responsibilities away from their attendants.

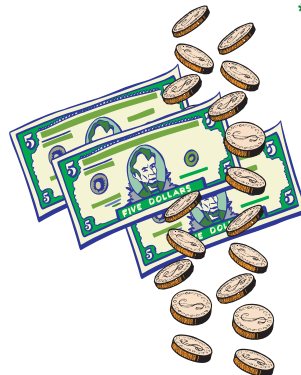

### THE BCX-Fujitsu SERIES MACHINES FEATURE:

- **Front Load and Rear Load models**  
Rear Loads: Painted Steel or Optional Stainless Steel Faceplates
