

STANDARD CHANGE-MAKERS

MODULAR SERIES

Front Load, Console Cabinet with Mega Capacity Hoppers

Built for Volume.

Designed for Versatility.

Whether you're running a busy laundromat or high-traffic game room, the MC900-DA Series console-style changers are built to keep up. With a durable steel cabinet, massive coin capacity, and *Smart Dual-Redundancy* technology, it's the reliable workhorse your business needs to keep the quarters or tokens flowing.

Each Model is equipped with two bill acceptors, each with 1,000 bill stackers to keep up with the coin capacity. The versatility of the design is the ability to dispense multiple coins at once: quarters, tokens, dollar coins, as well as Loonies and Toonies in Canada.

Choose the coin hopper setup that fits your business:

- **20,000 Quarters** in 2-Hoppers (2-10.0 K Hoppers)
- **15,400 Quarters** in 3-Hoppers (1-10.0K + 2-3.2K Hoppers)
- **12,800 Quarters** in 4-Hoppers (4- 3.2K Hoppers)

The console style cabinet provides high visibility in any business. Add an optional Backlit Sign Box and the 56" Tall Console cabinet is hard to miss! The cabinet features a Top Lid for easy refilling of the coin hoppers, and two front doors - giving access to the change machine and secured storage below.

MC900-DA Models Coin Hopper Capacity Chart

MC920-DA 2- 10.0K Hoppers (20,000 Qtrs / \$5,000)	MC930-DA 1- 10.0K Hoppers + 2- 3.2K Hoppers (16,400 Qtrs / \$4,100)	MC940-DA 4- 3.2K Hoppers (12,800 Qtrs / \$3,200)
		

What is Dual Redundancy?

More Uptime. Fewer Headaches.

Standard Change-Makers' "-DA" models feature our exclusive *Dual Redundancy Technology*, which allows all bill acceptors and hoppers to seamlessly communicate with one another using MDB communication protocol.

Here's how it works:

- If a hopper jams, its remaining vend is automatically re-routed to a working hopper.
- If a bill stacker reaches capacity, the second bill acceptor keeps the machine operating — no service interruption.

This built-in backup system maximizes uptime and minimizes lost revenue — keeping your changers working even when a component goes offline.

DIMENSIONS: 50"H x 28"W x 18"D

SHIP WEIGHTS: MC920-DA: 370 lbs.

MC930-DA: 375 lbs.

MC940-DA: 380 lbs.
