

MC700-TALL

HI-SECURITY
HI-CAPACITY
FRONT LOAD

Two-Hopper Front Load Change Machines that offer up to 10,400 Quarters (\$2,600) in a Secure, Heavy-Duty Cabinet

Big Capacity.
Small Footprint.
Built for the Real World.

Laundromats and car wash operators often face a tough trade-off: Most front load change machines max out too quickly, and high-capacity models take up too much space — and cost a fortune.

The MC700-TALL fills that gap!

These front-load, dual-hopper change machine models deliver up to 10,400 quarters (\$2,600) in a secure, compact cabinet — the perfect solution for sites that need to supplement their change capacity without giving up square footage or blowing the budget.

If you're running short on quarters too often — or just want a smarter backup to your primary change machine — the MC700-TALL gives you more capacity, more security, and more flexibility with a reasonable price point.

MC720-DA-TALL (shown)
