

REMOTE ACCESS PORTAL for STANDARD CHANGE-MAKERS

Total Machine Control, Wherever You Are.

Remote access. Real-time reports. Faster service. SCM Connect gives you the power to manage your change machines from your desktop or phone — whether you're across town or across the country.

How It Works:

SCM Connect™ works through the EF+ Module inside your Standard change machine. It connects to your network via Ethernet — no complicated setup, no third-party hardware.

Secure by Design:

We know machine access is sensitive. That's why **SCM Connect™** uses Dual Authentication login — a secure code is emailed to the email address on record before every access session. Your machine stays protected — and under your control.

Available Soon!

SCM Connect™ is available for all machines equipped with the EF+ Module and running updated software. Ready to upgrade your machines — and your freedom?

Ready to Connect?

Contact Standard Change-Makers and ask about **SCM Connect™** subscription service. Competitive pricing based on the number of locations, and the number of machines per location.

✓ Remote Reset Capabilities

Clear non-critical errors (like tamper faults) from anywhere — no more driving back to the store just to press a button.

📱 Mobile and Desktop Access

Use your smartphone, tablet, or PC to view reports and interact with your machines through the secure **SCM Connect™** web portal.

📊 Real-Time Reporting

Access Audit, Transaction, Configuration, Event, and Acceptance reports — all stored in the EF+ Module.

🔄 Reset Audit Report Remotely

Need to clear your Audit report after review? Do it with a simple tap on your phone.

💰 Remote "Force Dispense" Function

Verify customer complaints by reviewing bill acceptance and coin payout with time/date stamps — and dispense quarters remotely if needed.

💻 Smart for Multi-Store Operators

Avoid unnecessary trips and monitor multiple locations from one convenient dashboard.

REQUIREMENTS:

- Standard Change Machine equipped with EF+ Module running Ver 2.204 or higher and connected to the internet via Ethernet
- Internet connection with router/modem on site
- Android or iOS Phone/Tablet, or desktop computer with a **web browser** (such as Google, Safari, MS Edge)
- Active Monthly or Annual Subscription to **SCM Connect™** (prices based on: (A) Location and (B) Number of Machines at each location)
